

THE HARD EXPERIENCE OF RENEWABLE ENERGY PROFESSIONALS

Renewable Energy Development Workshop (**T-RED-LEVEL 3**)

Planning, Risk Management and Commissioning!

In order to establish a successful project, a well-planned strategy must be acquired

The participants will gain knowledge and will have the opportunity to interact with highly experienced renewable energy project managers and experts on resource assessment, system sizing, project planning, accurate energy yield assessment, best practice in design and installation, feasibility report, bid preparation and evaluation, O&M planning, documentation and knowledge management.

* Course covers both rooftop and large scale PV power projects.

THE HARD EXPERIENCE OF RENEWABLE ENERGY PROFESSIONALS**Course Content****Day One (1)**

5:30-7:00	Design Problem of Solar Powered Water Pumps <i>where attendees will learn how to use Taqetna inverters to power different water pumping applications</i>
7:00-7:15	Coffee Break
7: 15-8:30	Comparing Renewable Energy Technologies from financial perspective and calculate its Feasibility

Day One (2)

5:30-7:00	Special topics in Solar PV Design/Customization and LCOE sheets
7:00-7:15	Launch Break
7: 15-8:30	Project Management / Planning

Day One (3)

5:30-7:00	Project Management / Risks Mitigation
7:00-7:15	Coffee Break
7: 15-8:30	Project Management / Commissioning
